Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. Claims 17-25 are objected to because of the following informalities: claims 17-25 all use the word "claims", which should be "claimed". Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6-25 recite an apparatus, the claims being dependent on independent claim 1, which is a process. A signal claim which claims both an apparatus and the method steps for using the apparatus is indefinite under 35 USC 112, second paragraph. In *Ex parte Lyell*, 17 USPQ2d 1548. Also see MPEP 2173.05(p)II.

Allowable Subject Matter

4. Claim 1 is allowed.
5. Claims 6-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

Claim 1 teaches towards a process for transmitting data between a specific-rate radio network and data processing means comprising a PC linked with a terminal including a data adaptor through which data flows under the control of sequencing means, wherein the sequencer is locked to the rate of the radio network to synchronize data flow by filling a first buffer register with data to be sent originating from the processing means, generating network rate-synchronized extraction pulses by the sequencer means, extracting data from the buffer register with the pulses, encoding the data with the adaptor means and transmitting the data to a network interface radio means to be sent, and storing radio network originated data in a second buffer register means, using the pulses to extract data from the second buffer register means and decoding that data and transmitting it to the processing means. The prior art teaches means to lock a LO to a system clock, however it is neither taught nor suggested to use the two-buffer synchronized system of the instant invention in a data adaptor used between a radio network and a PC.
